Course 2: Approaches to Past Climate Change

UNIFOB GLOBAL

Course Leaders:

- Tore Sætedal, Director The Nile Basin Research Programme (NBRP)
- Leif Manger Professor of Anthropology and Director UNIFOB Global

Invited Course Leaders:

- Professor Mohamed ElShamey, Nile Forecast Centre, Egypt
- Associate Professor Semu Moges , Arbaminch University, Ethiopia

Disciplines:

Archaeology, anthropology, cultural studies

Short Course Description:

The course explores the role of cultural historical research and archaeology in building knowledge about climate change across a time span of thousands of years. It will be focused on case studies from the African continent and beyond. The course will also address different approaches to archaeological research.
